

Regarding the Ch Token Launch Plan

"Security is our only standard."

The official launch of **Ch Token** and the release of our **Whitepaper** will follow a strictly rigorous process. We are committed to ensuring that the exchange smart contract passes a comprehensive security audit and is confirmed to be free of vulnerabilities. Following the **official launch of the DeFi platform on the Testnet**, we will simultaneously initiate the following:

- **Official Whitepaper Release:** Full disclosure of tokenomics and technical specifications.
- **Smart Contract Deployment:** Ensuring user assets operate in the most secure environment possible.

We understand the community's high expectations, but asset security cannot be compromised. Thank you for your patience; we will share our progress with you immediately upon the Testnet launch.
